CPSC 471: Initial Draft Design

Tanner Collin, Jordan Heinrichs, Ali Waseem

1 Introduction

This report contains the initial draft design and a progress report for our project Renti, a peer to peer vehicle renting service. The current progress will discuss the technologies choosen for the framework and much work is done implementing it. As our project uses an Object Relational Mapping (ORM) to access our database we have an object orientated model which will be outlined. Lastly, the draft of the user interface is discussed.

2 Current Progress

3 Object Orientated Model

4 User Interface Draft Design

5 Conclusion
